## Finally a Positive Message

Stock market concerns...banking liquidity...  
Congressional bills in the \$900 billions...world-wide recession fears.  
So much negative worries that it is time for a Positive Message...

1

### Think Long Term

If you can wade through the recent market turmoil, you potentially could stand to gain. Ignore your portfolio for the time being and have patience. If you are contributing to a 401K, don't stop. Your dollar is going a lot farther than you may think. Be a positive force on investors and show confidence in American Markets.

2

### Low Prices!

If you were looking for a good time to enter the market, this may be it. Prices are low and there are bargains to be found. When Chrysler came close to bankruptcy in 1980, it received a loan from Congress and came roaring back and repaid the loan with interest. A lot of people made a lot of money buying the stock at its low in 1980 and selling it a few years later. Buy low, sell high!

3

### Opportunity!

Out of economic problems often comes opportunity! If you ever thought of buying a business, investing in real estate, or getting a bank loan – this could be the time! Congress has new tax ideas and new incentives – so listen up and grab a bargain.
